

### ***Company Profile***

Since 1985, Kaufman Hall has been a leading advisor to hospitals and health systems, helping them incorporate proven methods into their strategic planning and financial management processes and consistently achieve their goals. Management consulting services and enterprise performance management software enable data-driven analysis and quantify the financial impact of plans, scenarios, and actions to improve organizational decision making. Kaufman Hall provides sophisticated, integrated, and intuitive software solutions for long-range planning, budgeting and forecasting, performance reporting, capital planning, cost accounting, decision support and analytics on a unified platform that can be delivered via the cloud or on premise.
