

Create a Mobile Event App in No Time

Quickly build and configure your mobile event app. Add content and functionality and select branding that compliments your conferences, meetings, conventions, and trade shows.

It all Begins with the EventCenter

The easy-to-use content management system for your mobile event app.

A screenshot of the CrowdCompass EventCenter interface. On the left is a blue sidebar with a search bar and a list of menu items: Account, Product, Inc., App, CCPM Conferences, View All Apps, Event, Atlas Conference, View All Events, Event Overview, Design (highlighted), Event Icons, Splash Screens, Banners, Theme and Icon Pack (with a notification badge), Background and Colors, Advanced Color Customization, Navigation Icons, Customize Emails, Contents, Interactive Features, and Attendees. The main content area is titled 'Design' and contains the text: 'Choose from a library of pre-built themes and icon packs or customize your event with graphics, colors, and more.' To the right of the Design section is a 'Theme and Icon Pack' panel for 'Atlas Conference'. It has a 'Select a Theme' section with a grid of 12 theme preview cards, where the first card (blue and white) is selected with a dashed blue border. Below this is a 'Select an Icon Pack' section with a single icon pack preview card and a note: 'New! Multicolor Icon Packs. Multicolor Icon Packs come in preset colors.'

Custom Branding

Create a mobile event app that's in line with your brand. Upload your own graphics and icons, customize your color palette, and then extend that look and feel to your email templates – for a fully cohesive experience.

Instant Updates

Last-minute changes to activities, exhibitors or speakers? No problem! Updates in the EventCenter sync directly to the app, so your attendees are always in the know.

Multi-Event App

An integral part of any digital marketing strategy, leverage a mobile event app beyond your marquee event. Use a mobile event app for your internal meetings, trainings and company incentive trips to reach and engage your attendees year-round.

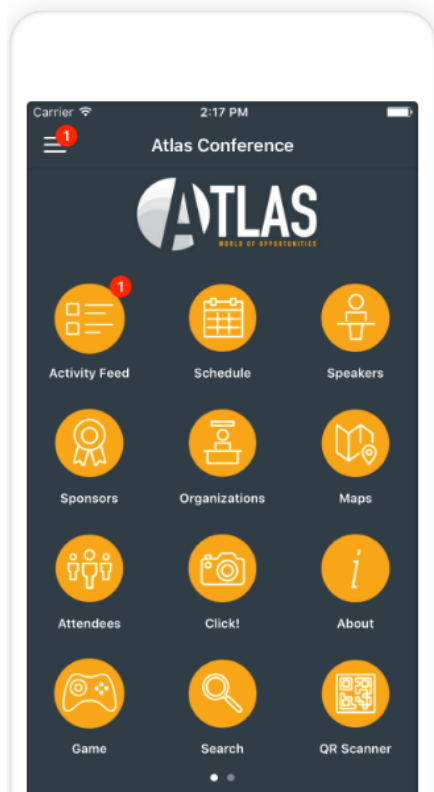

Share product announcements
and press releases

Collect valuable insights
with Surveys

Sell banner ads to sponsors and
exhibitors all year long

Native

Don't lose functionality due to spotty Wi-Fi. Our native app lets your attendees view event content and explore their schedules even while offline on iOS and Android devices.

HTML5

For those attendees that may still be using Blackberry, Windows devices, or just want to see the event content on their laptop or desktop, an HTML5 version the app is included.
