

Meet Our OnArrival Check-In App

OnArrival Customer-Facing Topic Hub ★ ★ ★ ★ ★

Check out a better way to check in by [downloading OnArrival](#). Compatible with Apple iPhones, iPads, and iPod Touches (installed with the latest version of iOS), our latest mobile app makes tracking attendance as easy as a swipe of the finger. Data automatically syncs with Cvent every 15 minutes.

You can search through your attendee list by name or email, filter by registration type, or [scan a barcode](#). Need to know their agenda or how they answered a registration question? Tap the invitee's name, then the eyeball icon. [Register walk-ins on the spot](#).

For paid events, [use our credit card reader](#) to collect payments and still keep the line moving.

Not going to have reliable Wi-Fi onsite? [Checking in works offline as well](#). Just log in and select your event online *before* reaching the venue. Once you've returned to the comfort of your connection, open the app and your data will sync automatically.

Best of all, OnArrival is free for Event Management users. Though if you're planning a larger event, [consider upgrading to OnArrival Premium or OnArrival 360](#). You'll enjoy a host of additional features once you make the leap, including [badge printing](#), [signature collection](#), [kiosk mode](#), and [session tracking](#).

Don't have the printers, badge stock, scanners, or extra iPads on hand? [Order an Event in a Box](#), which contains it all (including a guide to setting it up).
