

PHYSICIAN LED
HOSPITALS

HISTORY OF LSSH

Lafayette Surgical Specialty Hospital was created by one orthopedic surgeon and originally founded by 8 physicians who sought a different model of delivering surgical care to their patients. LSSH later added nearly 30 physicians who worked diligently to open a fresh, new environment to provide the safest, highest quality and the most cost effective care in 2004.

 **LAFAYETTE SURGICAL
SPECIALTY HOSPITAL**
— PROUDLY PHYSICIAN OWNED —

CHALLENGES

PATIENT PROTECTION AND AFFORDABLE CARE ACT

AKA ACA/PPACA

LIMITATION ON EXPANSION OF FACILITY CAPACITY.—Except as provided in paragraph (3), the number of operating rooms, procedure rooms, and beds for which the hospital is licensed at any time on or after the date of the enactment of this subsection is no greater than the number of operating rooms, procedure rooms, and beds for which the hospital is licensed as of such date.

PAYORS

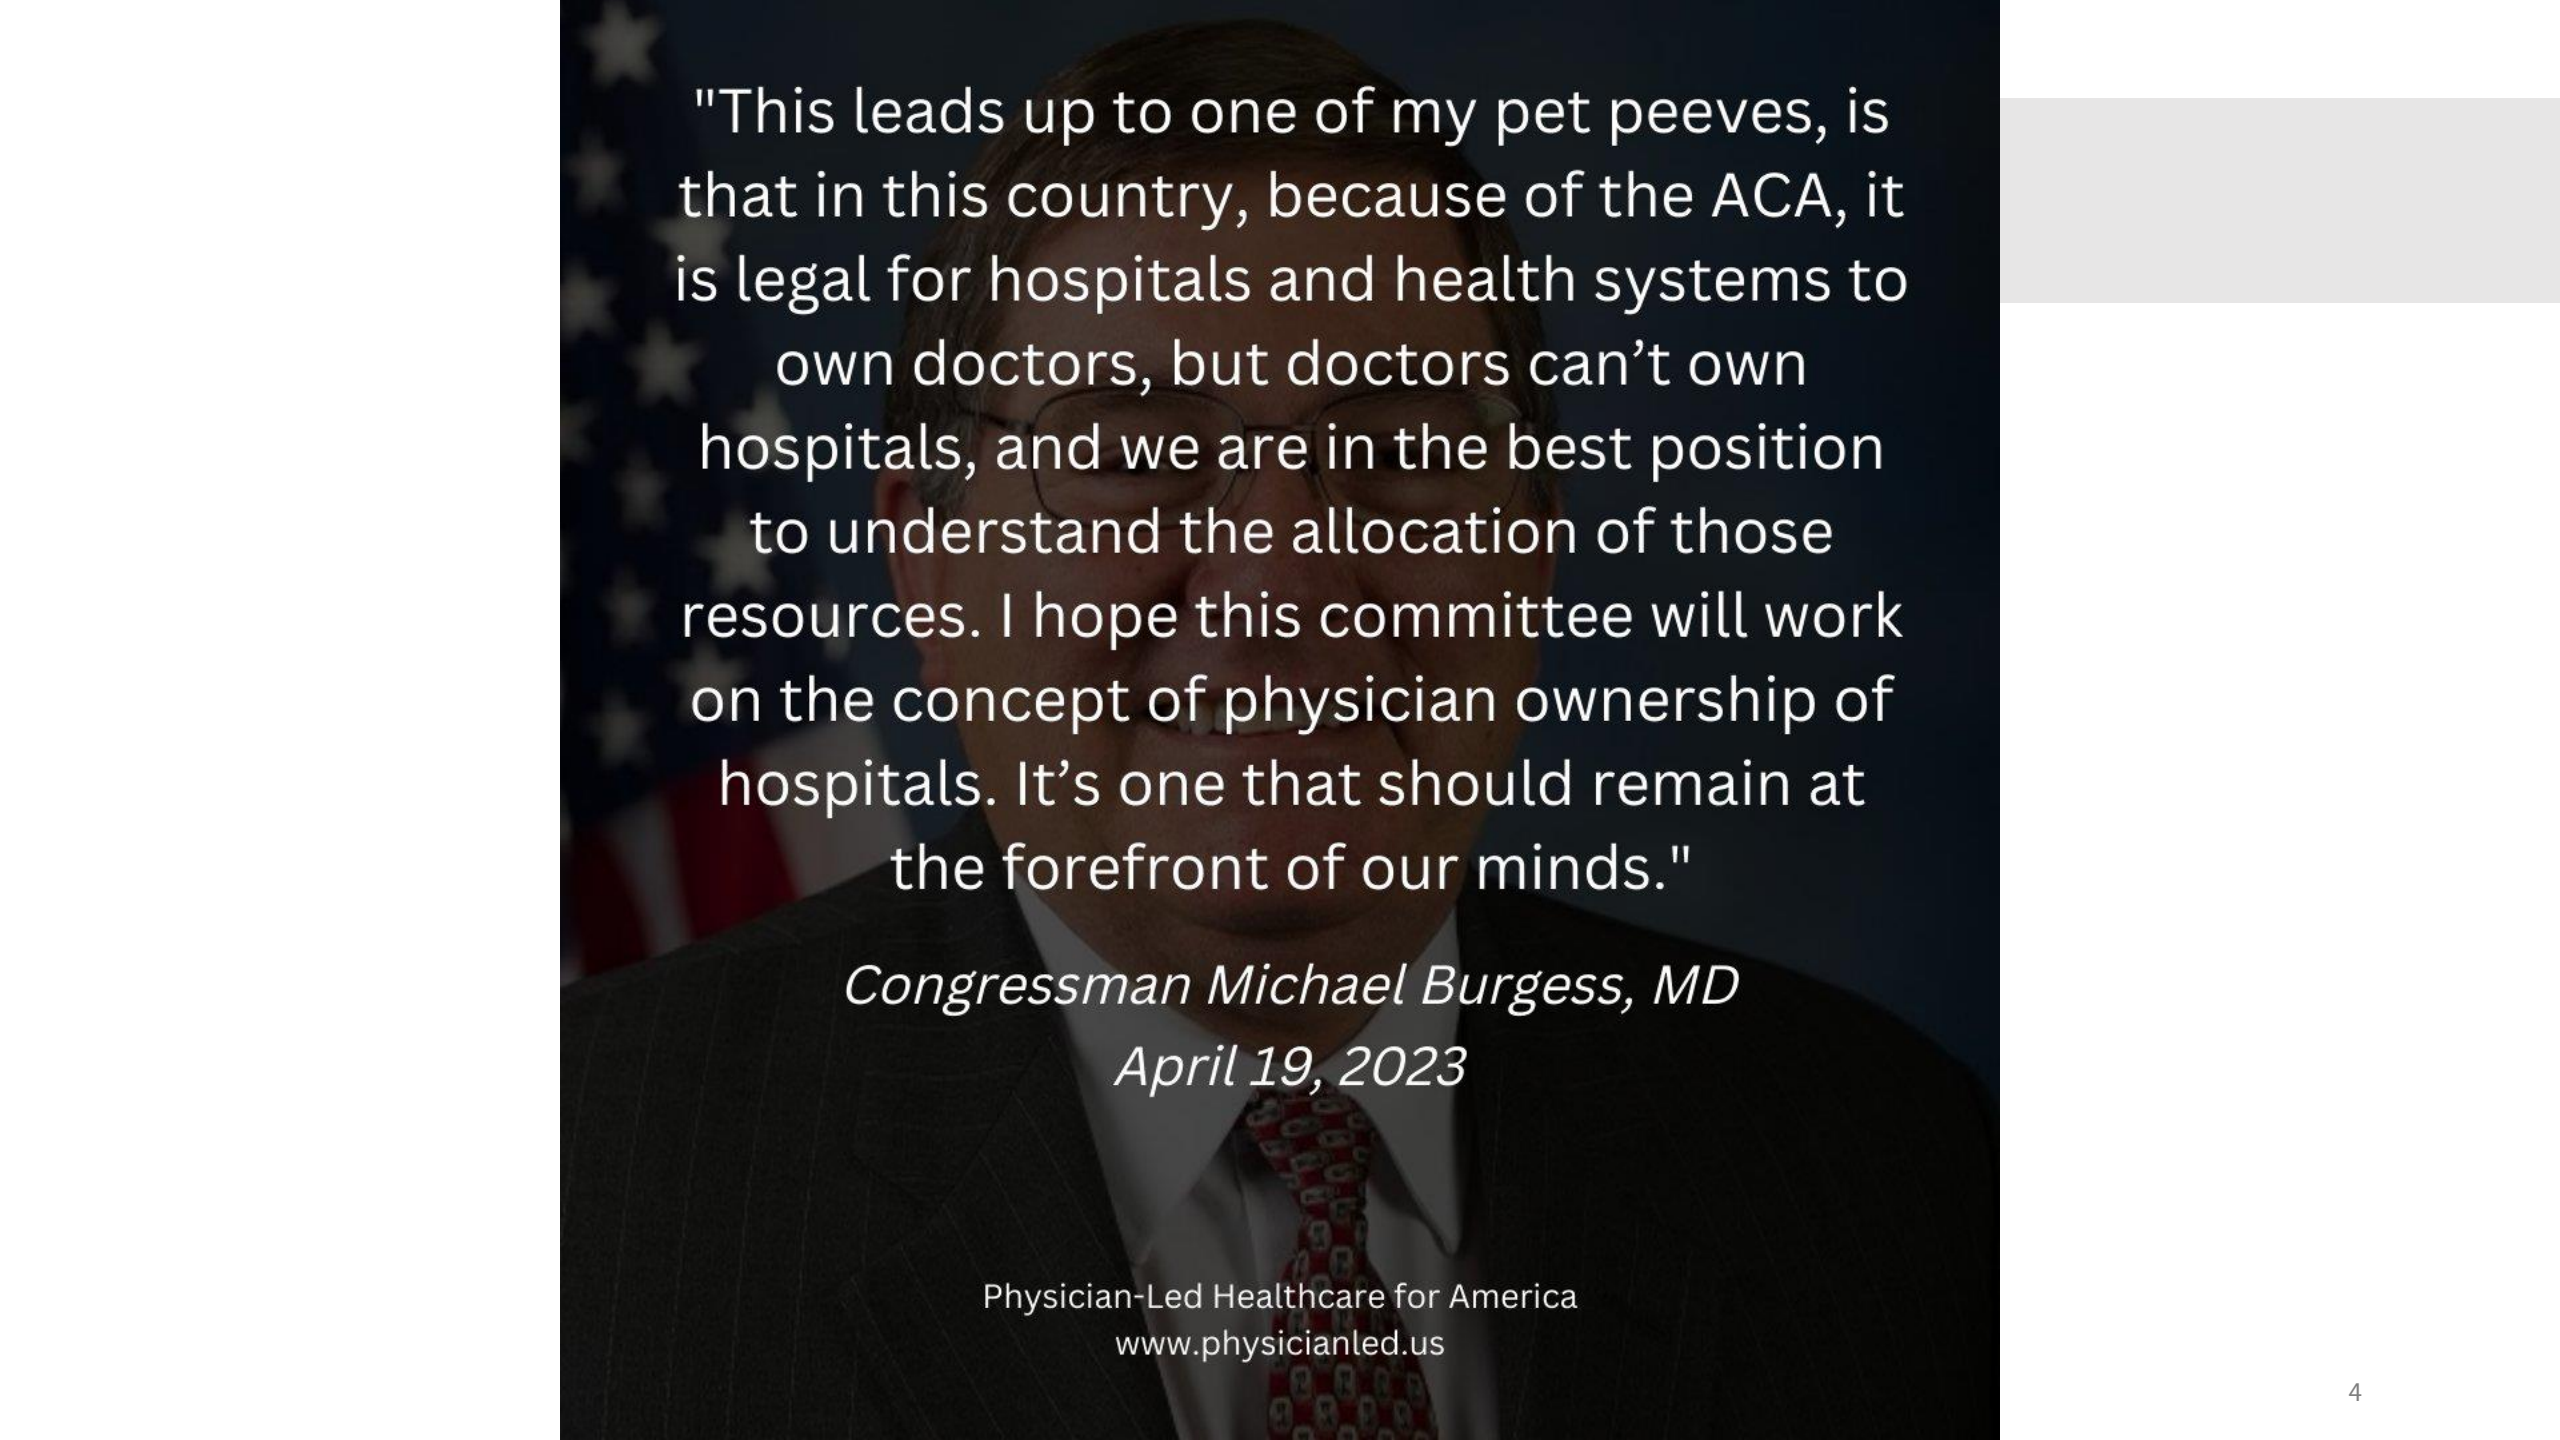

Negotiating contract rates is discriminated.

STANDARDS AND REGS

Held to same standards as an acute care hospital.

ONGOING LEGISLATION

Mentioned in almost every session since 2010.

"This leads up to one of my pet peeves, is that in this country, because of the ACA, it is legal for hospitals and health systems to own doctors, but doctors can't own hospitals, and we are in the best position to understand the allocation of those resources. I hope this committee will work on the concept of physician ownership of hospitals. It's one that should remain at the forefront of our minds."

Congressman Michael Burgess, MD

SETTING THE BAR

CREATIVITY

Continue to think outside of the box

SETTING THE BAR HIGH

Nearly 4,000 hospitals in the US.
430 Hospitals have 5 Star Ratings
by Hospital Compare
56 of those are Physician Owned

COST SAVINGS

Physician and nurse driven to
make the best and most cost-
effective care for our patients

TEAMWORK

HOW DO WE ADAPT AND SUCCEED

AMBULATORY SURGERY CENTER

Adapt to Outpatient surgical/procedural care delivered

URGENT CARE

Engage at the start of care

COMMUNITY PARTICIPATION

Myth: Physician owned hospitals “cherry pick” patients

OTOLARYNGOLOGY

We treat over 2,000
Otolaryngology patients
annually

SUMMARY

LIMITATION ON EXPANSION OF FACILITY CAPACITY.—

Except as provided in paragraph (3), the number of operating rooms, procedure rooms, and beds for which the hospital is licensed at any time on or after the date of the enactment of this subsection is no greater than the number of operating rooms, procedure rooms, and beds for which the hospital is licensed as of such date.
