

Innovating Revenue Integrity Through Advanced Analytics

Doreen Bunyea RN CCS CPC COC | Director Charge Integrity, Nuvance Health
Stephanie Martin DNP-ELc, MSN, BSN, COC-H | Director, PwC
Jennifer Jones RHIA, MHA | Senior Manager, PwC

1

Learning Objectives

- Understanding data construct variation across clinical and revenue cycle
- Identify and navigate gaps in the consolidated data and validation steps with key clinical and revenue cycle stakeholders
- Understand tools and dashboards to support strategic decisions and change management initiatives

2

4

Increased Focus on Price Transparency

Centers for Medicare & Medicaid Services (CMS) leaders say the agency has handed out nearly 500 warnings to hospitals falling short on price transparency as of January [2023] and plans to streamline enforcement and standardize hospital reporting requirements.

Increased transparency will span most stakeholders. Required actions by all stakeholders will impact hospitals

5

HFMA | 2023

Strategic Decisions for Revenue Integrity

Business Challenges

- Business Challenges**
 Regulations help guide the industry and continue to change at a rapid pace. Hospitals have to be agile when making strategic decisions for their organization and for their patients
- Organizational Acquisitions**
 The healthcare landscape is changing for health systems and providers
- Charge Description Master (CDM) Structure**
 The CDM is the foundation for charging. Variations in structure can impact clinical workflow, maintenance efficiency and throughput of charges.
- Financial systems & reporting**
 Consolidation of financial systems and reporting capabilities at the level of granularity is essential to make data-driven decisions
- Pricing Methodology**
 There is the additional complexity of regulatory scrutiny due to price transparency. Many health systems have an increased focus to develop a strategic pricing methodology for chargeable services, supplies, and pharmaceuticals that is also defensible across payers and patients

6

Strategic Decisions for Revenue Integrity, continued

Industry Challenge: Supply and pharmaceutical pricing analysis includes understanding disparate data sets and how to align them to support strategic decision making. Aligning and ingesting the large and complex data sets have proven to be a significant hurdle to establishing a defensible pricing strategy.

Supplies

Transition from a one-to-one charge structure to a one-to-many charge tiering structure

Pharmacy

Enable programmatic and strategic updates to NDC and medication cost information

7

7

From Data to Dashboard

8

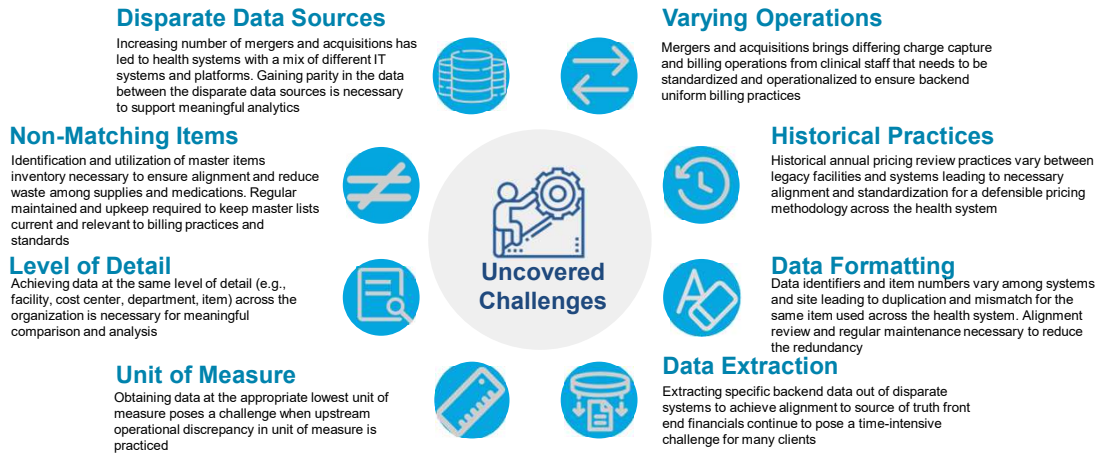

Data Inputs and Data Structure

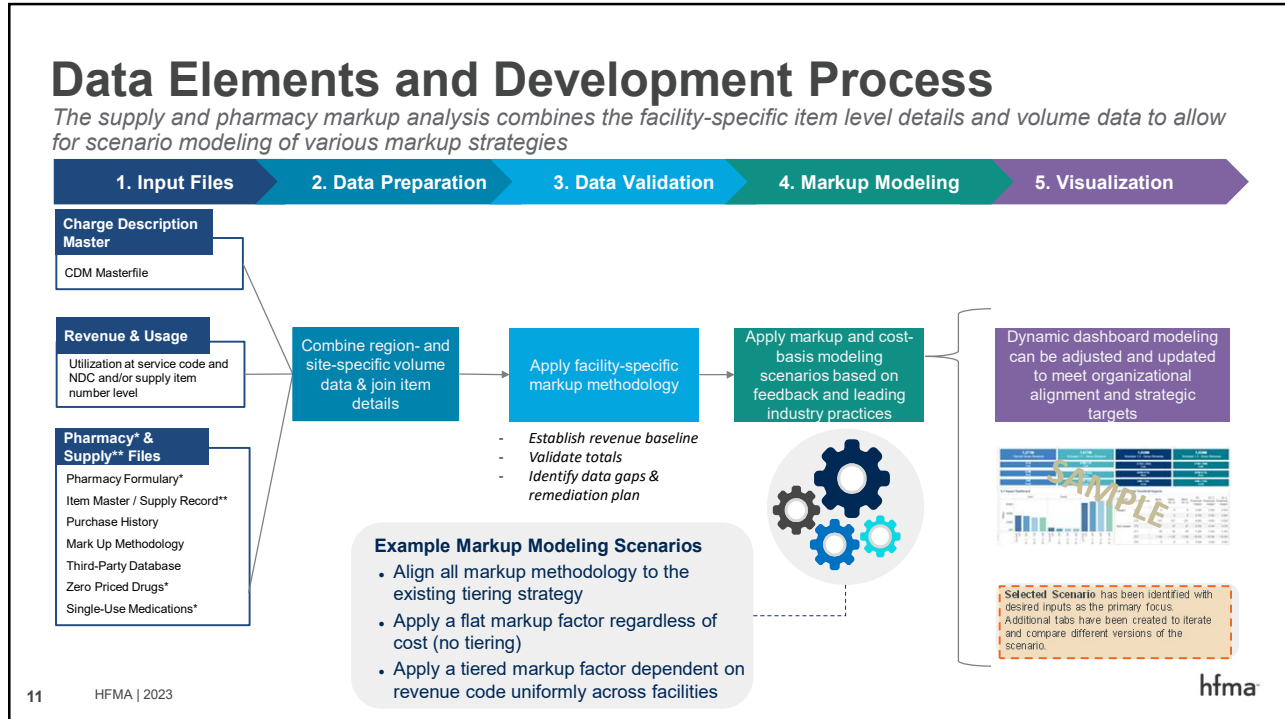

Supplies and Pharmacy share similar data approaches and methodologies in addressing cost structure and markup methodology

Description	Supplies 	Pharmacy 
Masterfile	Item master/ mat mgmt. file	Formulary
Source base	Catalogue # / Manufacture #	NDC
Usage	Revenue & Usage Purchase History	Revenue & Usage Purchase History
Reference Files	Third party vendor(s) Industry benchmarks	Third party vendor(s) Industry benchmarks
Categorization (by price or item)	Supply category or cost tier	Medication category or cost tier
Other	Low-cost medications Non chargeable items	Low-cost items Study-based medications
Markup Methodology	Cost x Mark Up Flat Fee based on cost	Cost x Mark Up Flat Fee based on cost

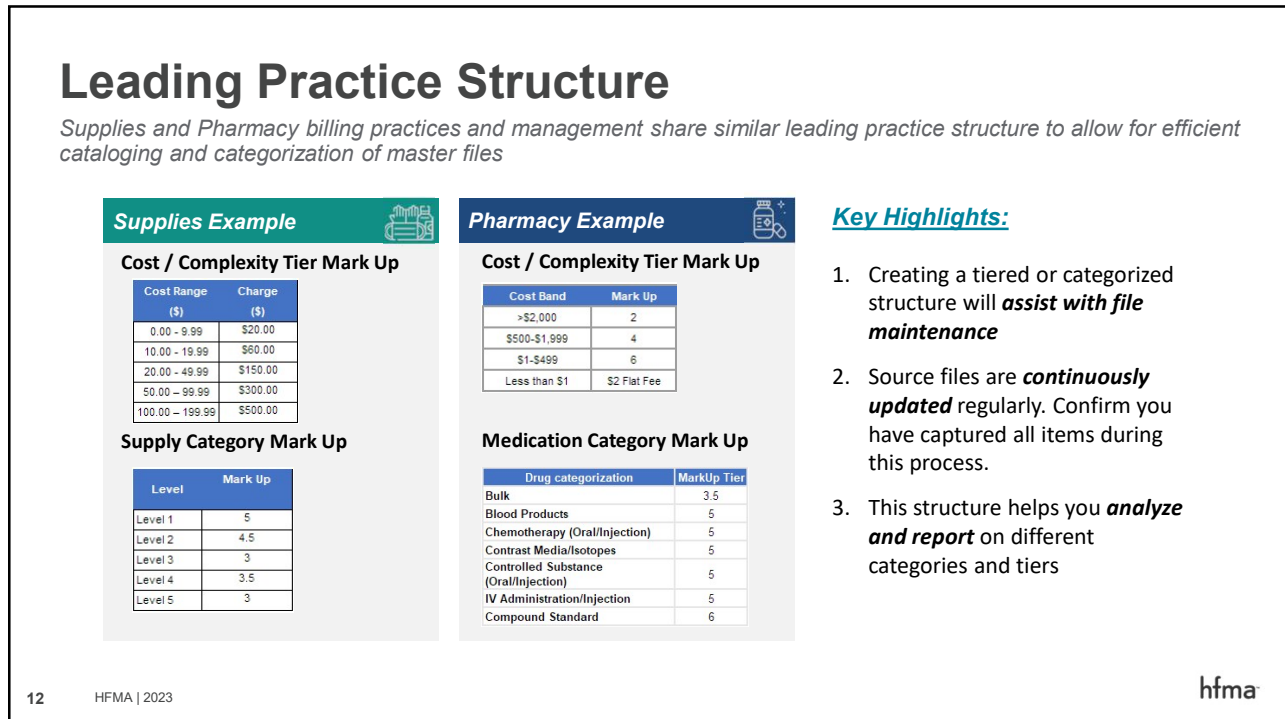

Challenges in the Data

Data exploration and analysis uncover unforeseen challenges and opportunities to build an ideal future state scenario

11

12

Dynamic Dashboard and Visualization

Dynamic dashboard modeling the financial impact on gross revenue of varying markup methodologies enables strategic design of best-fit solution for the organization

Scenario Ideation
Brainstorming and idea collection with key internal/external stakeholders to develop leading scenarios for modeling

	Current State	Scenario 1	Scenario 2	Scenario 3
Hosp A	Cost: AWP Mark Up: Tiered	Cost: AWP Mark Up: ATB	Cost: AAC Mark Up: ATB	Cost: AWP Mark Up: ATB
Hosp B	Cost: AAC Mark Up: ATB	Cost: AWP Mark Up: Tiered	Cost: AAC Mark Up: ATB	Cost: AWP Mark Up: ATB

Modeling Evaluation
Executed model for comparison and fine tuning of scenario outcomes and determine best model to achieve strategic direction

	Current State	Scenario 1	Scenario 2	Scenario 3
Hosp A	\$50M	\$50M	\$40M	\$55M
Hosp B	\$75M	\$90M	\$75M	\$80M

Line-Item Validation
Line-level detail investigation of selected scenario model allows for validation of model performance

Scenario 3		Line-Item Detail	
	Current State	Scenario 3	
Med 1	\$5	\$6	✓
Med 2	\$2	\$70	✗

Variance Investigation
Tools to assess large changes at the line level further aid in model performance and evaluation

Scenario 3		Variance	
	Scenario 3	Var	
Med 1	+\$1M	Large Positive Var	
Med 2	-\$0.9M	Large Negative Var	

Recommendations

Final recommendations developed as an outcome of reviewing and evaluating proposed scenario models to arrive at a best-fit solution for the organization:

Supplies
New charge categories associated with proposed OR charge structure based on cost range

Pharmacy
Cost basis alignment utilizing industry-standard cost and multi-year adjustment to single across-the-board markup across the organization

Supply Dashboard - Example

Dynamic dashboard modeling the financial impact on gross revenue of varying markup methodologies enables strategic design of best-fit solution for the organization

15

Beyond the Data

16

Change Management through Socialization

Engagement with key stakeholders and impacted parties required for collective understanding, constant refinement and consensus gathering for future-state solution

Workgroup Establishment

Cross-functional stakeholder workgroup with regular cadence to review, investigate and make key decisions on the impacts and outcomes of the solution. Workgroup members inclusive of accountable leaders and responsible parties work to evaluate solution at every level

Workflow Documentation

Examination and documentation of a sequence of work process from initiation to completion outline the current state workflow and gap identification in critical areas. Adjustments to existing workflows to support final solution must account for current state limitations

Roles and Responsibilities

RACI matrix identifies and describes the responsibilities by role in completing tasks to support the solution. Outlining the members of the team and specific tasks in the project brings clarity and efficiency in establishing the new process

Policies and Procedures

Establish and/or update guidelines to outline the organization's plan for implementation and maintenance of the solution. Collective development and agreement among the workgroup ensure success with executing the day-to-day operations to achieve the overarching action plan

Thank you.
